SKILLS

COMPUTER SKILLS

Microsoft Word | Microsoft Powerpoint | JavaScript | Microsoft Excel | HTML & CSS | Javascript | React | Django | TailWind Css | Python (Basics)

OTHER SKILLS

Public Speaking and public relations | Teaching English

HOBBIES AND INTERESTS

Reading, Coding, Running

Reading

I enjoy reading a wide range of books, from personal development and psychology to technology and world literature. Reading not only deepens my knowledge but also helps me think critically and view challenges from different perspectives. It's one of the ways I keep learning and stay inspired in both my academic and personal life.

Coding

I have a strong interest in programming and enjoy experimenting with Python, HTML, and CSS to bring creative ideas to life. Coding allows me to combine problem-solving with creativity, and I find great satisfaction in building simple yet functional web projects that improve my understanding of technology.

Running

I'm passionate about running every morning at 5 AM, covering around 5 kilometers daily. This habit keeps me physically active and mentally focused. It has taught me discipline, persistence, and the value of small, consistent progress — lessons that I apply to my studies and personal goals as well.
